Completions Supplement

One hundred and twenty-four Massachusetts colleges and universities have degree granting authority recognized by the Massachusetts Board of Regents of Higher Education. Of these 124, 122 institutions regularly grant degrees and general awards of completion. Woods Hole Oceanographic Institute and Worcester Foundation for Experimental Biology participate with other colleges in specific programs of joint study and research in which the student does not receive a degree from Woods Hole or from Worcester Foundation.

The Integrated Postsecondary Education Data System (IPEDS) is a federal survey set issued annually to each state by the National Center for Education Statistics (NCES). The Completions 1986-87 survey was distributed to 122 Massachusetts colleges and institutions that granted degrees and awards in the year which spanned July 1, 1986 to June 30, 1987, and all 122 colleges and universities responded to the survey.

Section I

General Statistics. Massachusetts colleges and universities conferred a total of 78,374 awards of completion. The independent sector conferred 53,132 awards. The remainder came from the public sector: 25,242 awards or, in percentage terms, 32.2% of all awards granted in Massachusetts. Of the 78,374 total, 42,610 (54.4%) awards were given to women; men constituted the remainder with 35,764 (45.6%). In terms of the percentage of women who graduated from a sector, 66% of women graduates received their awards from the independent sector; 34% of women graduates came from the public sector. The percentage patterns for men were similar: 70% for the independent sector and 30% for the public.

Within each sector, public colleges and universities reported that 14,484 (57.4%) of their graduates were women compared to 28,126 (52.9%) completions in the independent sector. Higher numbers of degrees were awarded to women than for men, except at universities. More degrees were awarded to men at that level: 51.9% in the public sector and 54.7% in the independent sector.

From these findings, we can construe the following:

1. Men and women seem to be equally attracted to both sectors of Massachusetts higher education.
2. Each sector reported higher numbers of women graduates than men.
3. The source of the higher numbers for women graduates in each sector appears to be the four and two year colleges.

Section II

Award Levels. The independent and public sector awarded 51.1 and 53.9% of all their degrees at the baccalaureate level. It was followed in the public sector by the associate's degree (31.6%), the master's degree (9.2%) and certificates requiring one but less than two years of study (2.7%). The independent sector, however, reported a different pattern: master's degree (24.9%), associate's degree (10.8%), and the first-professional (6.8%).

Award levels by gender varied significantly. Women were awarded 62.4% of all pre-baccalaureate awards. At the baccalaureate level, more men than women received bachelor's degrees: 53.5% for males and 46.5% for females. Beyond the baccalaureate, male and female rates were almost equal.

Digitized by the Internet Archive
in 2013

<http://archive.org/details/198687completion00mass>

From the second section we can summarize by the following:

1. Public colleges and universities appear to have geared themselves to mostly undergraduate programs along with the master's degree. Their counterparts in the independent sector seem to have done the opposite, concentrating their efforts towards graduate programs and study along with the undergraduate associate's degree.
2. On a percentage basis, more men than women received baccalaureate degrees, but women graduated in greater numbers from programs to two year pre-baccalaureate and other undergraduate certificates.

Section III

Programs. The five program areas that attracted the largest number of graduating students were business & management, social sciences, engineering, education, and health sciences. Program areas with the largest number

of male graduates were business & management, engineering, social sciences, engineering related technology, and computer information sciences. As for women the top five program areas were business & management, education, health sciences, social sciences, and allied health sciences.

Of the largest twenty program areas, architecture, environmental design, law, and theology attracted more students to independent colleges than to public institutions. The public sector does not provide a graduate law program or a theology program; these areas are exclusively the independent sector's. Public colleges provide programs in architecture and environmental design, but they are small in number and size. Two public institutions, University of Massachusetts at Amherst and the Massachusetts College of Art, graduated students from this program in year 86-87, but the University of Massachusetts at Amherst was the only public institution to confer graduate degrees in that field.
